

## MEASUREMENT AND DATA

[www.jwfltd.com](http://www.jwfltd.com)

We can offer further help and support as we provide expertise in three areas: **Instrumentation**, **Commissioning and Calibration** and **Data**.

### Instrumentation

JWF partners with world-leading instrumentation companies **ABB**, **WIKA**, **Flexim** and **Canalta**. Our priority is to bring you advice on the most appropriate instrumentation solution for your process as well as the opportunities presented by new technology.

#### To help you:

- Optimise production opportunities

### Commissioning and Calibration

Our team can commission your instrumentation, digitally verify it, and calibrate it onsite or on our liquid and gas rigs.

For educating your team, we have excellent training facilities in Glasgow or can deliver at your site.

#### To help you:

- Ensure accuracy
- Validate instruments
- Optimise your process
- Establish preventative maintenance

### Data

Work with an experienced team of highly skilled software engineers to develop data solutions that will provide your team with meaningful information, and the tools to support continuous improvement.

#### To help you:

- Understand consumption
- Reveal opportunities for greater efficiency
- Reduce costs
- Anticipate issues
- Resolve problems faster
